

Seito Queuing Tag Management System

Seito Queuing Tag Management System keeps getting queuing tags at restaurant as basic operation and supports to check queuing status by mobile phone. This operation model on one hand minimises the situation of affecting efficiency by many no show customers who are using mobile app to get queuing tags freely. On the other hand, customers are able to leave for a while and not to miss seating arrangement. Furthermore, setting a TV at the reception to show queuing status with clear calling sound makes customer queuing more orderly and efficiently.

Managing customer queuing and seating with ease!
